September 27, 2005

Dear Recipient/Interested Party:

The Washington State Department of Health (DOH) has updated the fish consumption advisory for the Lower Duwamish Waterway site located in King County, Washington. DOH updated the advisory based on the analytical results of fish tissue collected in August and September 2004. The enclosed health consultation was prepared to support the updated fish advisory.

A reader evaluation form is also enclosed. Please take the time to complete and return it within two weeks (postage is paid). DOH relies on the input from affected communities and involved agencies to effectively address health concerns. Your knowledge about the site and surrounding community helps to improve the quality of our work and how we communicate with you.

Feel free to share this document with others who may also be concerned about the public health issues outlined in this health consultation. If you have questions or would like additional information, call me at (360) 236-3377 or toll free at 1-877-485-7316.

Sincerely,

Gary Palcisko
